Date Of Injury:	02-22-2013 12:00
Date Of Birth:	03-26-1967
Employer Name:	PREMIER PERSONNEL RESOURCES
Claim #:	TWCS-1588
Chart #:	EMR/Yb

Patient Status:
Since the last exam, this patient's condition has: Not improved significantly

History Of Present Illness:
Patient is here for follow up visit for injury sustained on 02-22-2013 12:00.
The patient reports that their condition is the same - Patient reports they followed the treatment plan as directed. The patient states that treatment was tolerated. Patient is currently on modified duty .
Comments: Patient still has pain to her low back. She completed 6 PT sessions so far..
Back Complaints / Symptoms
Complaint: Patient's complaint at this time is as follows: pain - low back. Patient describes the symptom(s) as dull. She says it is mild. She reports having symptoms for 80 days. The frequency is intermittent.
Associated Symptoms: The patient denies dysuria . The patient denies polyuria . The patients states there is no hematuria . The patient denies fever, chills, and sweats . The patient denies parasthesias . The patient states the back pain does not radiate . The patient complains of limited back motion - . The patient denies any leg weakness . The patient states there is no numbness or tingling of the lower extremities . The patient denies any changes in bowel habits . The patient denies any bladder or bowel dysfunction .

Occupational history: Length of employment is reported as 6 months to 2 yrs. She works 40 hours per week. Main job characteristics include prolonged standing or walking, kneeling or squatting, bending, stooping and overhead work, lifting, pushing, or pulling up to 50lbs.
She denies any lost work-time as a result of this injury. She denies any other source of employment.
Surgeries: No Known Surgical History

Medical History: Patient denies history of ulcers or gastritis. No history of Diabetes. Patient states no known major/recurrent illnesses/injuries.

Tetanus History:
Last tetanus - unk.

Family History: Diabetes in relatives.
Social History: Alcohol or Tobacco use: She does not use tobacco. Denies alcohol use.

Review Of Systems:
A review of the patient's Family History, Social History, Medical History, Allergy, Current Medication and Surgery and a

complete review of systems obtained from the health history completed on 02-25-2013 was done and any interval changes are noted.
Constitutional Symptoms: Recent weight change - .
Women Only: Menstrual irregularities. .

Current Medications at the start of Encounter:
Omeprazole D.R. 20mg #30 . 1 capsule daily. prevent upset stomach from medications, , Dispense 1 Container
Orphenadrine Citrate ER 100mg Tabs #30 . 1 at bedtime/ 1 al acostarse, Dispense 1
Polar Frost 150ml 5oz Gel Tube 1 Twice A Day PRN , Dispense 1 Container
Tramadol/Acet HCL 37.5/325 mg #20 . 1 Tablet every eight hours as needed for pain , Dispense 1 Container
Etodolac ER 600MG #15 . 1 once daily with food for pain and inflammation / 1 once al dia con comida para dolor y inflamacion, Dispense 1 Bottle
Allergies:
No Known Drug Allergies.

Physical Examination:
Pulse: 66/min. BP: 106/72 mmHg. Temperature: 97.4 deg F Respiration: 16 per min.

On a severity scale the pain is 8 out of 10.

Constitutional: The patient is a well-developed, well-nourished female.
Psychiatric: Mood and affect appear appropriate .
Respiratory: There are no apparent signs of respiratory distress .
Gastrointestinal: Abdominal palpation is normal .
Genitourinary: Costovertebral angle tenderness for renal involvement is not noted .
Musculoskeletal: The patient ambulates with a normal gait, full weightbearing on both lower extremities . The patient has normal posture . There is no weakness of the lower extremities . The spine is not kyphotic . The patient does not have scoliosis . The patient has no loss of lumbosacral lordosis . The pelvis is symmetrical . There are spasms of the paravertebral musculature . There is tenderness of the paravertebral musculature - . Range of motion of the back is restricted. Flexion with the fingertips approximating the knee . Extension 15/30 deg. lateral flexion L 25/45 deg R 25/45 deg, lateral rotation L 15/30 deg R 15/30 deg.
Cardiovascular: The popliteal, anterior tibial and posterior tibial pulses are 2+/2+ bilaterally and capillary refill time is normal bilaterally.
Neurologic: Heel/toe ambulation is performed without difficulty . Bilateral patellar and achilles deep tendon reflexes are 2/4. Sensation is intact to light touch and pinprick in all dermatomes of the bilateral lower extremities. The straight leg raising test (SLR) is positive. Left positive at 80 deg. Right positive at 80 deg. The back muscles display no weakness .
